

Green Facades

Green facades differ from vertical gardens by using climbing vines and creepers, planted in a lightweight and automated planter systems with appropriate trellis. Fytogreen provides three main facade systems

Green Facade Using tensile webnet, square mesh or cables to train climbing plants to cover buildings and walls.

Pre-Grown Green Facade Units This unit provides great foliage cover at installation, instead of waiting up to 2-3 years.

Planter Boxes Our range of Linear Low Density Polyethylene (LLDPE) planter boxes provide a flexible container for both planter boxes and green facades. Vast colour range and bespoke size available. Aluminum powder coated option available to provide a fire compliant solution.

Key Benefits of Planting a Green Facade

Reduce Building A/C Energy Costs

Reduce Reflective Light & Heat

Cost Effective Greening Solution

Minimal Equipment Access Requirements

Suitable for Internal or External Applications

Aluminum Fire Compliant Options Available
